Update to 3M™ Scotchcast™ Liquid Resins 5, 8, 9, 10, 208, and 210

Dear Valued Customer:

3M Electrical Markets Division (EMD) announces an update to 3M™ Scotchcast™ Liquid Resins 5, 8, 9, 10, 208, and 210.

3M is making minor changes to the resin and kits listed above to reflect the removal of the Nonylphenol component in these products. This change is consistent with 3M's sustainability values and long-standing leadership in environmental stewardship.

The existing products will be phased out as current inventories are depleted over the next few months and replaced with what will be known as:

- Scotchcast Liquid Resins 5N, 8N, 9N, 10N, 208N, and 210N

A list of existing and replacement products is included with this communication. New orders will be automatically replaced with the updated products as they become available.

The technical data sheets are unaffected by the change and we do not expect any change in the performance of the material. The Safety Data Sheets, labels and packaging have also been updated to reflect the new material. As always, it is up to the customer to determine suitability for your application.

For more information about these or other 3M EMD products, please contact 3M Customer Service at (800) 676-8381 or your 3M Sales Representative.

Sincerely,

3M Electrical Markets Division
