**Re: Customer Notification for Re-branding of products**

Dear Valued Customer,

We would like to inform you about some important changes to Henkel's product brand portfolio. During our past decades of strong growth and diversification, we have acquired a large number of product names and brands which have now become somewhat complex to navigate. Based on customer feedback, Henkel has decided to reduce the complexity of our brand portfolio, by clustering our brands by product technology.

The Electronics group of Henkel will be using the LOCTITE technology brand for the following product chemistries (Epoxies, Urethanes, Silicones, and Solder materials) and the TECHNOMELT technology brand for hotmelt adhesives.

These new brand clusters together with newly defined nomenclature maps for product naming will make it easier to navigate our product offering. With this simplified branding structure and nomenclature, we are confident that it will be much easier for you to find the right solution for your needs.

**We want to assure you that the re-branding DOES NOT involve any changes to the product composition or chemical formulation.** For most products we are simply appending the technology cluster brand (LOCTITE) to current product names and creating a technology mapping nomenclature for all new products. We tried to minimize the change effect by maintaining the product numbering system for all legacy products. This branding project will be rolled out by manufacturing sites **starting in 2012 and continuing through 2014.**

For your convenience we are attaching a complete list of products you have purchased in the past 18 month. Additional notifications will be sent out for products that will be changed later in the re-branding project, approximately **60 days prior to any change.**

For your convenience we created a re-branding website ([henkel.com/electronicsbranding](http://henkel.com/electronicsbranding)) for additional information. Please review any questions you might have with your local sales representative.

Sincerely,

Douglass Dixon  
Global Marketing Director
